Fast Track to Ansible Automation

- ✓ Establish automation workflows and best practices.
- ✓ Implement use cases to get you started.
- ✓ Help your team understand Ansible basics with immersive training sessions.

Ansible Content Migration and Upgrade

- ✓ Migrate playbooks from Ansible Tower to AAP.
- ✓ Migrate playbooks from AWX to AAP.
- ✓ Upgrade playbooks to the newer Ansible version.
- ✓ Create execution and evaluation environments.

Customized Automation Deployment

- ✓ Set up and configure complete Ansible environments.
- ✓ Provision Red Hat Ansible Automation Platform (AAP).
- ✓ Develop custom playbooks and modules.

Security and Compliance

- ✓ Monitor automation workflows with Steampunk Spotter.
- ✓ Prevent misconfigurations and security vulnerabilities.
- ✓ Integrate security policies.
- ✓ Ensure compliance across your infrastructure.

“XLAB delivered better, faster, and more cost-effective solutions than we could achieve internally.”

— Dave Demlow, Vice President of product strategy at Scale Computing

IT Automation Specialists and Leading Ansible Experts

XLAB is an endorsed Red Hat partner and collaborates closely with the Ansible product team and Red Hat Consulting. As a specialist in IT automation with Ansible, a leading expert in building Red Hat Certified Ansible Collections, and provider of Ansible Playbook Platform for efficient and secure automation, XLAB offers full-scale automation solutions.

Our Approach

Consultation and Planning

- ✓ Expert IT infrastructure and workflows assessment.
- ✓ Tailored automation strategy and clear roadmap with key milestones, deliverables and timelines.

Professional Trainings

- ✓ Hands-on immersive training sessions and follow-along labs.
- ✓ Tailored content covering Ansible concepts, AAP usage, playbook development, and best practice.

Long-Term Support

- ✓ Continuous guidance from Ansible specialists for troubleshooting, optimization, and best practices.
- ✓ Strategic advice to enhance and expand your automation capabilities.

Ongoing Maintenance

- ✓ Regular reviews and updates of your workflows and automation scripts.
- ✓ Optimization to ensure your automation environment runs smoothly.

Why XLAB?

Unmatched Expertise

Our team has extensive experience with Ansible and collaborates closely with the Ansible product team, successfully automating complex processes across various industries.

Customizable Solutions

We don't offer a one-size-fits-all solution. Leverage our deep knowledge for tailored solutions that scale with your needs.

Committed Partnership

We work closely with you to understand your needs and deliver goal-oriented solutions. From initial planning to full-scale automation, we support you every step of the way.

Seamless Integration

We minimize disruption while maximizing automation benefits, with a focus on knowledge transfer.

About XLAB

XLAB is a global IT solutions company focused on remote desktop technology (ISL Online), automation and management of hybrid infrastructure (XLAB Steampunk), and AI, building on breakthroughs of its own research team.
